DETAILED ACTION

1. This Office Action is responsive to the RCE with attached amendment filed 9-25-03. In the amendment claims 2-7, 15, 16 and 19 were canceled. Claims 1, 14, 17, and 18 were amended. Claims 21-42 were added.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1, 8-14, 17, 18 and 20-42 are rejected under 35 U.S.C. 103(a) as being unpatentable over Pierrat, US Patent Number 5,780,187.

The Examiner has considered the amended claims, the newly added claims, and the comments attached thereto, however, they are not found to be persuasive in overcoming the prima facie obvious rejection of record as set forth in the previous Office Actions. The 35 USC 103 rejection over Yedur et al. has been withdrawn. The 35 USC 103 rejection over Pierrat is maintained. The Examiner relies on the comments of record presented in paragraph 4 of the previous Office Action, Paper No. 4, in combination with the following remarks.

The Examiner points out that the reference states a material deposition system is utilized (see column 5, lines 7 and 8) for depositing the fill material. Applicant's arguments are drawn to the preferred systems of the prior art, but there is nothing in the reference limiting the invention to the preferred systems. In fact, dip coating, spray coating and spin coating are the three most common material application methods in this art area for deposition of a fluid material. One of skill in the art at the time the invention was made would have found it prima facie obvious to utilize any well-known coating methods, including dip, spray and spin, in the teachings of the

prior art with a reasonable expectation of obtaining a highly useful photomask that has been repaired. Furthermore, there is nothing in the instant claims prohibiting the use of the ion beam milling and polishing for trimming the extra material as shown by the prior art.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claim 14 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 14 contains confusing language and should be redrafted to clarify the scope.
